
THE
**REAL
REASON**
BEHIND **80%**
OF STRUGGLING STUDENTS'
**LEARNING
CHALLENGES**

An estimated 25% of students exhibit signs of learning difficulties.

Of this group, some 80% have a specific, addressable reason you've likely never heard of that is causing their struggles.

The Real Reason Behind 80% of Struggling Students' Learning Challenges

An estimated 25% of students exhibit signs of learning difficulties.

Of this group, some 80% have a **specific, addressable reason** you've likely never heard of that is causing their struggles.

As parents, teachers, and medical professionals, we worry about students who are slow to grasp concepts.

- They are discontented.
- They lose focus.
- They fidget.
- They disrupt others.
- They fall behind.

We spend extra time with them. We connect them with tutors. We have them meet with counselors or therapists. We care about them deeply and try everything we can to help them overcome their obstacles – unfortunately, often to no avail.

When you have hit a wall trying to discover the solutions to struggling students' obstacles, we provide insights that quickly **eliminate common misconceptions** and **illuminate core issues and their solutions**.

As the premier doctor-led solution provider in Utah to these hurdles, *ACHIEVE Learning Sciences™* has teamed up with professionals, educators, and parents to **eradicate addressable learning challenges for Utah students by the year 2035**.

A lofty goal? Yes.

Achievable? With your help, *absolutely!*

The Reason Behind Students' Learning Difficulties

You may be surprised to discover that the reason behind 80% of struggling students' learning challenges is **not** heredity, lack of interest in learning, laziness, mental capacity, or any of the other culprits we typically blame. The primary reason is *vision-related deficiencies*.

"But my student has 20/20 vision," you reply. Yes. However, we often confuse *vision* with *sight*. One's sight can be 20/20, and still, that person will experience vision-related issues

because the intricacies of vision go far beyond the clarity of one's sight – bringing multiple other factors and processes into play.

Discover the Solution First-Hand

You likely don't want to read a book on the many ways vision problems can adversely affect your student, so we won't make you read one. You simply want **specific answers for your child's unique situation**. You've found the last place you will need to look.

Teachers and medical professionals, please extend an invitation to your struggling students' and patients' parents. Parents, bring your child to us. A detailed assessment will **reveal** their vision-related difficulties if they have them and **rule out** such obstacles if they do not.

If your child's learning struggles are not vision-related, we will identify the best path forward for your child and connect you with a specialist in our network with the expertise to address the need we uncover in the assessment.

You want your child to succeed. We want to **alleviate the frustration you've felt** as you've looked for answers. End the search for the best solution to your child's learning difficulties by setting an appointment today.

Call our talented staff at **801-492-6393** right now and set your child's assessment appointment. It's the best move you can make right now to help your child enjoy a whole new level of success at school – and in every facet of life!

We look forward to meeting you and your child.

Your partners in your child's success,

Dr. Mark Curtis, OD, FCOVD
Dr. Jeremy Gardner, OD, FAAO
Dr. Christopher Pope, OD
